

Google Device Policy

For Android users

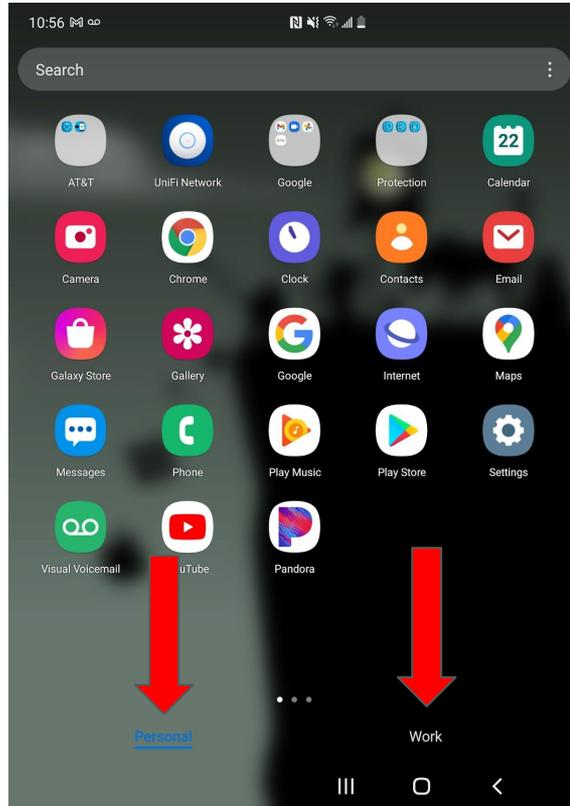

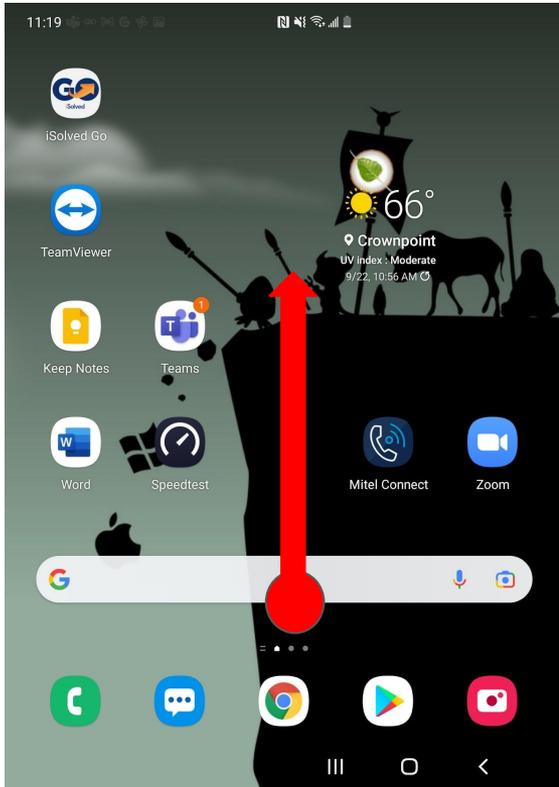

After download and installing Device Policy

What is Device Policy?

This is to prevent any data loss from Navajo Tech accounts or devices. Devices that have NTU accounts on them get the device policy. Also it is to separate your personal data from NTU (work) data.

- Download and install device policy
- Sign into your NTU email account
 - Some users may need to sign into SSO
- After Policy has been applied
 - Swipe up on home screen to see Personal and Work profiles

Swipe up

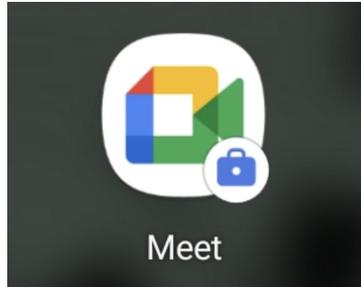

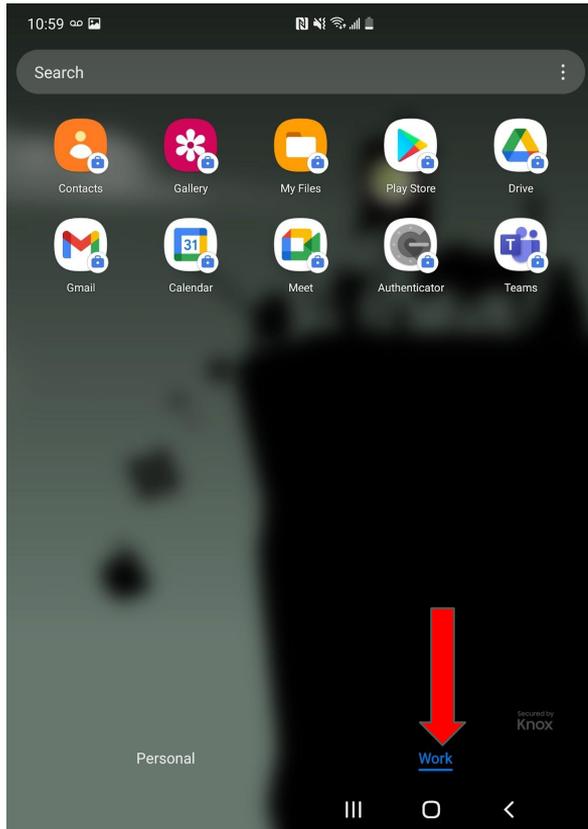

When you swipe up you will see you apps

Down at the bottom you will see Personal and Work

- These are your profiles

In you Work Profile

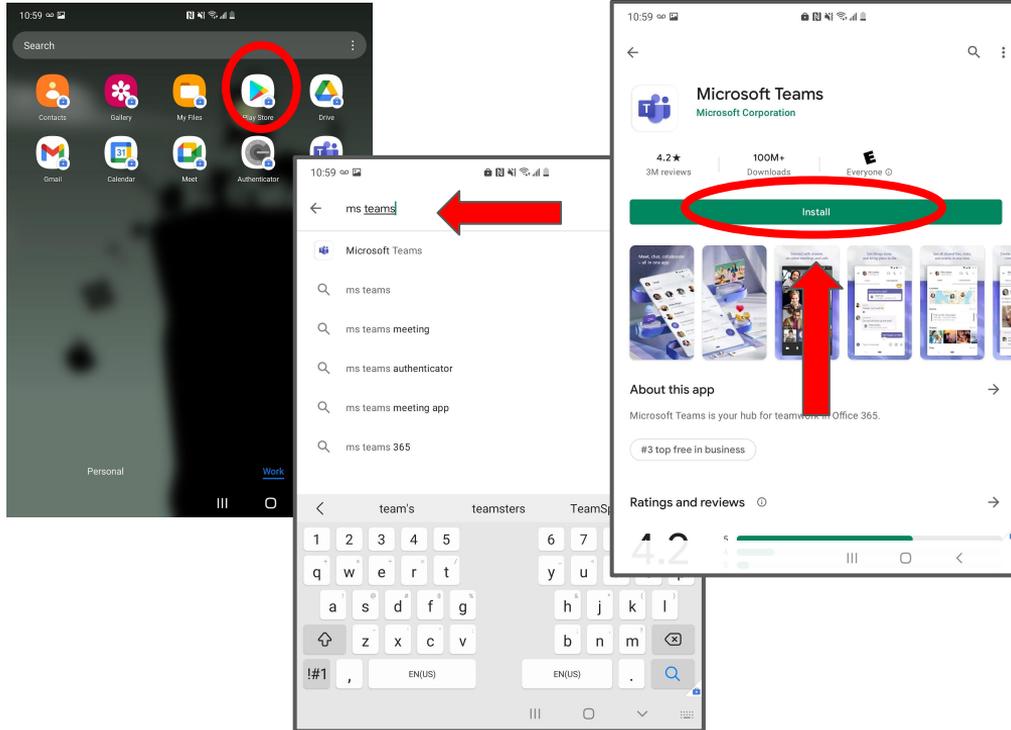

Users can download and install apps approved by IT administrators.

After apps are downloaded and installed please sign in to app using your NTU email address.

To Identify work apps

- App will have a blue icon of a brief case

To download your apps in work profile

- Tap the Google Play
- Search for app
- Tap install

Have any questions

Please contact NTU IT office for more information.
